## OBJECTIVE

---

Experienced Front End Developer with 1 year, seeking a challenging position to leverage expertise in React, Next.js and SQL. Committed to developing efficient, scalable, and high-quality software solutions that drive business success.

## TECHINICAL SKILLS

---

**Languages :** HTML / CSS, JavaScript, Bootstrap  
**Frameworks :** React, Node.js, Next.js  
**Tools :** Git, Docker  
**Database :** MySQL, MongoDB

## EXPERIENCE

---

**Associate Software Engineer**  
MadhuPushpa Technologies Pvt Ltd

Jun 2024 - Present  
Bangalore

- Built reusable components and maintained state management using React hooks and Context API.
- Optimized React applications for performance using techniques like lazy loading and memoization.
- Integrated APIs and handled asynchronous data fetching using Axios or Fetch API.
- Fixed defects within the deadline provided and worked in Agile Scrum.
- Enhanced application performance with Next.js image optimization and incremental static regeneration.

## PROJECTS

---

**E-Commerce Platform (MERN Stack)** [React, MongoDB, Express.js, Node.js]

- Developed a scalable e-commerce platform using the MERN stack to enable users to browse, search, and purchase products. The platform included features like user authentication, shopping cart, order management, and real-time notifications. Integrated secure payment gateway and admin dashboard for inventory and user management.
- Built a RESTful API with Express.js to manage products, orders, and user data. Secured API endpoints using JWT for authentication and role-based access control for admin features.
- Visualized GitHub data to show collaboration
- React razorpay payment gateway integration. (next.js)

**RealEstate Web Application** HTML, CSS, Javascript, Bootstrap

- Developed a user-friendly web application to showcase real estate properties, enabling users to search, filter, and explore property listings. The platform featured an intuitive interface, responsive design, and interactive elements to enhance user experience.
- Built responsive and semantic HTML layouts to structure the web pages.
- Implemented interactive features like dynamic property filters, image carousels, and modal popups
