OBJECTIVE

Experienced Front-End Developer with over 2+ years, seeking a challenging position to leverage expertise in React Js, Next Js and SQL. Committed to developing efficient, scalable and high quality software solutions that drive business success

TECHNICAL SKILLS

Languages	HTML / CSS, JavaScript, Bootstrap, Tailwind CSS
Frameworks	React Js, Node js, Next js
Tools	Git, Docker
Database	MYSQL, MongoDB
Softwares	Photoshop

EXPERIENCE

Associate Software Engineer

MadhuPushpa Technologies Pvt Ltd

Jun 2024 - Present

Bangalore

- Built reusable components and maintained state management using React hooks and Context API
- Optimized React applications for performance using techniques like lazy loading and memorization
- Integrated API's and handled asynchronous data fetching using the Axios or Fetch API
- Fixed defects within the deadline provided and worked in Agile Scrum
- Enhanced application performance with Next Js image optimization and incremental static generation

Software Trainer

MadhuPushpa HR Consultancy

Jun 2023 - Jun 2024

Bangalore

- Delivered training on HTML, CSS, JavaScript, Bootstrap and React Js to entry-level developers
- Created and led hands-on coding sessions to build real-world front-end skills
- Simplified technical concepts to suit diverse learner backgrounds
- Conducted assessments through assignments, quizzes, and code walkthrough
- Supported onboarding by preparing freshers for live project environments

PROJECTS

Kayaka Crafts – E-Commerce Platform MERN Stack [MongoDB, Express.js, React.js, Node.js, Next.js, Razorpay] - [Kayaka Crafts](#)

- Developed a full-featured, scalable e-commerce platform enabling users to browse, search, and purchase products
- Implemented user authentication, role-based access (JWT), and secure REST APIs for managing users, products, and orders
- Integrated Razorpay payment gateway in the React frontend (Next.js) for seamless and secure transactions
- Designed responsive UI with product listings, filters, and a real-time shopping cart using React and Bootstrap
- Created an admin dashboard for inventory control, order tracking, and user management with role-based access
- Built RESTful backend services in Express.js and Node.js, using MongoDB for efficient data storage and retrieval
- Added real-time notifications and status updates to improve user engagement and order visibility
- Followed MVC architecture and applied best practices in API versioning, error handling, and token security

Real-Estate Web Application [HTML, CSS, JavaScript, Bootstrap]

- Developed a responsive web application to showcase real estate properties with a clean and modern UI
- Designed structured HTML layouts and styled them using CSS and Bootstrap for consistent design across devices
- Implemented dynamic filters to allow users to search and sort properties by location, price range, and property type
- Integrated image carousels and modal popups for an enhanced viewing experience of property details and galleries
- Added interactive UI elements using JavaScript to improve user engagement and functionality
- Optimized the layout for mobile devices and ensured compatibility across major browsers
- Focused on user experience by keeping the interface intuitive and easy to navigate

Career Guide Web Application [HTML, CSS, JavaScript, Bootstrap, React Js]

- Built a responsive platform to help students explore and choose suitable career paths based on interests and background
- Designed a clean and intuitive UI using React.js and Bootstrap for easy navigation and guide selection
- Implemented dynamic filters and interactive components to personalize career guide recommendations
- Focused on mobile-first design and smooth user experience using React state management and modular layout

Startup Guide Web Application [HTML, CSS, JavaScript, Bootstrap, React Js]

- Developed a web application to guide aspiring entrepreneurs through the startup journey with curated content and tools
- Designed responsive and user-friendly interfaces using React.js and Bootstrap for seamless access across devices
- Implemented dynamic navigation and categorized resources to help users explore funding, legal, and business topics
- Enhanced user experience with interactive components, smooth transitions, and mobile-first design practices

EDUCATION

Master of Arts in Economics, Karnataka Open University Karnataka
